

201-4150 Solder Skills Practice Kit**Instruction: INS1078****Page 1 of 1**

This training kit is used to practice circuit board soldering skills prior to testing for certification.

1. The Soldering Skills Practice Kit is designed to help operators brush up on their circuit board soldering skills.
2. The kit is also ideal for operators and technicians to use for practice prior to IPC certification.
3. The kit includes a circuit board and 15 different component types.
4. Each component has a designated location on the circuit board to be soldered.
5. This kit does not include a soldering iron, solder or fluxes.

For detailed instructions covering a range of soldering procedures see www.circuitrework.com/guides/guides.html

Includes the following items.

Qty	Description	Component Type
10	Resistor, 0805	Chip
10	Resistor, 1206	Chip
6	Capacitor, 1206	Chip
5	Capacitor, Tantalum	Chip
8	MELF Diode, 1206	Chip
3	QFP-44, 0.8mm Pitch	Gull Wing
3	QFP-100, 0.5mm Pitch	Gull Wing
8	SOIC-14	Gull Wing
6	SOT-23	Gull Wing

Qty	Description	Component Type
3	PLCC-28	J Lead
6	Resistor, 1/4 Watt	Through Hole
3	Transistor, TO-5	Through Hole
3	Transistor, TO-18	Through Hole
6	Capacitor, CK05	Through Hole
3	DIP-14, Narrow	Through Hole
